As a seasoned Web Engineer with over a decade of experience, I excel in leading technical teams and nurturing engineering talent. My leadership style focuses on creating dynamic, competitive environments that foster professional growth and team cohesion.

## Experience

### ***Extend, Inc. San Francisco, CA (Remote)***

*May 2022 - December 2023*

#### Engineering Manager

- Led a team of 6 engineers, responsible of Extend's merchant and internal admin clients to manage their warranty and protection programs
- Collaborated with various platforms teams and leaders to support requested features and guest develop across services
- Assisted engineers to create measurable benchmarks for growth that were unique to their own strengths and weaknesses
- Led technical initiatives to adopt Remix within the organization for key projects
- Team Achievements
  - Top 75th percentile for annual story points completed
  - 85th percentile in sprint completion, 75th in predictability
  - 92nd percentile achievement in defect resolution

### ***Extend, Inc. San Francisco, CA (Remote)***

*August 2021 - May 2022*

#### Staff Engineer

- Modernized a React web client to reduce complexity, enabling developers to build and resolve defects more efficiently
- Mentored team members while working with other staff engineers to set standards of quality and best practices regarding front-end tooling
- Worked cross functionally with other micro service owning teams to communicate requirements and guest develop features on both platform services and clients
- React, TypeScript, AWS Lambda, NodeJS, DynamoDB

### ***Whole Foods Market Inc. Austin, TX***

*July 2019 - July 2021*

#### Senior Engineer

- Developer within WholeFoods supply chain team, supporting solution suite of several legacy and modern web applications.
- Implemented a design system leveraging web components with framework specific bindings in both Angular & React, allowing teams more autonomy in their solutions while providing consistent and repeatable patterns.
- Led development of pilot program for in-store mobile applications to replace legacy handhelds
- C#, Angular, React, TypeScript, PostgreSQL, AWS Lambda, AWS EC2, Web Components

**RentPath Inc. - Rent.com, Atlanta, GA (Remote)**

Jan 2018 - July 2019

Senior Engineer

- Developed high-performance features for rent.com using React and TypeScript in a dynamic team setting
- Demonstrated self-motivation and excellence in delivering production-grade code within a fast-paced environment
- Contributed to a Ruby on Rails rewrite, implementing feature flips and A/B testing to optimize conversions and overall site performance.
- React, TypeScript, NodeJS, GraphQL

**Independent Consulting. Houston, TX**

Jun 2017 - Jan 2018

Web & Mobile Engineer

- Retail e-commerce web applications Shopify and custom platforms
- Mobile app development built in React Native or Ionic Framework
- Modern web application training in React & Angular

**SensorInsight, LLC. Houston, TX**

Jan 2014 - Jun 2017

Lead Developer

- Led and mentored a distributed team of 8-10 developers building SensorInsight.io, an IoT platform
- Individually designed and implemented web application UI/UX
- Routinely met with executive leadership, turning business requirements into technical specifications for the engineering team
- AngularJS, Java EE, MQTT, AWS EC2, PostgreSQL

**Clearblade, Inc. Austin, TX**

Oct 2012 - Jan 2014

Mobile Consultant & Web Engineer

- Modernized client legacy systems on IBM System Z mainframes
- Served as a cross platform mobile developer using early builds of Apache Cordova and AngularJS
- AngularJS, JQuery Mobile, Ionic, Go, MQTT, React

## Skills

Angular & AngularJS 1.x	Ionic, React Native	NodeJS/Express, Go, PostgreSQL, MySQL, MongoDB, Cassandra, DynamoDB
React/Next/Remix	Github Actions, JenkinsCI, Git	EC2, AWS Lambda, SQS, Docker, Kafka

## Education

**BBA, Texas State University;** San Marcos, TX  
Computer Information Systems

Fall 2012
